

HEALTH DATA EXPLORATION SUMMER INSTITUTE 2016

Call for Participation

When: July 10-16, 2016

Where: Calit2 on the campus of UCSD, San Diego, CA

Who: PhD students and Early-career researchers

Deadline: Application review begins April 29, 2016

New sources of personal data can provide insight into human health and behavior.

The HDE Summer Institute is an intensive, 1-week training institute on personal health data research methods for doctoral students and early-career researchers. Participants will be chosen by competitive application from a variety of relevant disciplines including public health, medicine, informatics, human-computer interaction, computer science, data science, and design. World-renowned faculty will lead seminars in theory and methods and mentor student group projects. Participants will gain hands-on, practical experience working with new technologies and data sources in interdisciplinary project groups. Tuition, room, and board will be provided for accepted participants.
