Ankle–Brachial Blood Pressure

INSTRUCTIONS: This form should be completed during the participant’s clinic visit. ID Number, Contact Year, and Name must be entered above. Whenever numerical responses are required, enter the number so that the last digit appears in the rightmost box. Enter leading zeroes where necessary to fill all boxes. If a number is entered incorrectly, mark through the incorrect entry with an "X". Code the correct entry clearly above the incorrect entry. For "multiple choice" and "yes/no" type questions, circle the letter corresponding to the most appropriate response. If a letter is circled incorrectly, mark through it with an "X" and circle the correct response.

“You will have blood pressures checked in your arms and legs. The method used to do this is similar to standard blood pressure measures. An ultrasound device will be used allowing you to hear the blood flow while the blood pressure is taken. There is no more discomfort involved beyond having a blood pressure cuff placed on your arms and ankles.”

A. EXCLUSIONS

1a. Does the participant have any open wounds in the ankle or arm cuff area? ................................................................. Yes  
                                            Y  
                                            No  
                                            N  
                                            Exclude; Go to Item 25

1b. Has the participant undergone bilateral amputation? ................. Yes  
                                            Y  
                                            No  
                                            N  
                                            Exclude; Go to Item 25

1c. Is the participant unable to lay at <45 degree angle? ............... Yes  
                                            Y  
                                            No  
                                            N  
                                            Exclude; Go to Item 25

1d. Has the participant had a double mastectomy? .......................... Yes  
                                            Y  
                                            No  
                                            N  
                                            Exclude; Go to Item 25
B. MEASURES

2. Arm cuff size: ........................................ Small adult (< 24 cm)  S
   Regular adult (24–32 cm)  R
   Large adult (33–41 cm)  L
   Thigh (>41 cm)  T

3a. Arm used [RIGHT PREFERRED]: ........................................ Right  R
    Left  L

3b. Explain why right arm was not used:

4a. Right ankle cuff size: ........................................ Small adult (< 24 cm)  S
    Regular adult (24–32 cm)  R
    Large adult (33–41 cm)  L
    Thigh (>41 cm)  T

4b. Left ankle cuff size: ........................................ Small adult (< 24 cm)  S
    Regular adult (24–32 cm)  R
    Large adult (33–41 cm)  L
    Thigh (>41 cm)  T

5. Doppler systolic: ........................................ [^ADD 30 TO GET MAXIMAL INFLATION LEVEL]
   +30 mm Hg

6. Maximal inflation level: ........................................
7. Brachial: ................................................................. mm Hg
8. Right posterior tibia: ................................................ mm Hg
9. Left posterior tibia: .................................................. mm Hg
10. Left posterior tibia: ................................................ mm Hg
11. Right posterior tibia: ................................................ mm Hg
12. Brachial: ................................................................. mm Hg

13. Was the first arm blood pressure measurement obtained? ........ Yes Y  No N  —Go to Item 15

14. Identify all reasons the first arm blood pressure measurement was not obtained.
   Yes       No
   First arm: ........................................ 14a. Unable to occlude: ......... Y  N
   14b. Unable to locate artery: ..... Y  N
   14c. Other (please specify): ...... Y  N  —Go to Item 15
14d. Specify:

   ..........................................................
15. Was the first right ankle blood pressure measurement obtained?
